

Hole in One

From 'Baby Steps to STEM'

You need:

- Large stacking rings
- Pegboards
- Sorting cubes or buckets

Show your child how to place the rings on their post, or pegs/shapes into the sorting cubes or buckets.

Talk to them about how there is a hole or space to put the items in. Offer one item at a time so they can explore the materials. Talk about the colours and shapes that you are using; you could also count them or sort by colour/shape.

This activity helps children understand number sense, operations and cause and effect.
